As a follow-up to the message below, a brief explanation of how the Production Set 12 files are organized is provided below:

- (1) The Proposed Release with Redactions folder contains emails with proposed redactions in transparent view which allows you to see what is being redacted.
- (2) The Proposed Release in Full Emails folder contains emails that were not redacted.
- (3) The Proposed Release in Full Attachments folder contains attachments that were not redacted. Because some of the attachments have 100 or more pages, I included them as a separate file. This will allow you to navigate through them more easily.

Enclosed is the next proposed interim release of documents for the PAGs FOIA request. Please contact Susan Johnson by Thursday March 8, 2018 with any questions, concerns, or feedback regarding the documents.

Since this is a larger production, I have organized the files into three separate folders. I will send a follow-up email explaining how this production set has been organized.
